

BED

By Michelle Miller

Start with a BPF bed and remove the cloth cover. Spray the bed with white paint or primer. Paint the color of choice. I used a light blue paint that I mixed.

Glue the floral spray printies to the headboard and footboard. Cover the mattress area with the striped floral paper. Take the check printie and cut strips 1 block wide and add one strip to the bottom of the bed on either side. Cut a piece of paper towel approximately 1 1/2" x 2" and separate it so you are just using one thickness. Apply tacky to the back, scrunch it up and add it to the bottom half of the bed to resemble a messed-up blanket. You can make some pillows from the striped printie and paper towel using a bit of fluff from the end of a Q-tip for stuffing.
