

TABLE AND CHAIRS

By Michelle Miller

I used the table and two chairs from a set of BPF furniture. Spray a coat of white primer or paint on the pieces. When dry, paint the color of your choice. I used a light sage green color - Folk Art Bayberry.

Turn the table upside down on the floral printie centering a flower and trace around it. Cut it out and glue to the top of the table.

Cut two seats from the striped printie, again centering the flower. Glue to seats.

Take the checkered printie and cut strips one block wide. Trim the edge of the table top and legs with these strips. Also trim the edges of the chairs. See photo.

When dry, spray all pieces with a coat of clear matte finish.

SMALL BUFFET OR DRESSER

Use a BPF dresser and cut off the mirror. Sand the cut area smooth. Sand off the knobs. Spray this with white primer or paint. When dry, paint the color of your choice. I used Folk Art bayberry.

Cut a strip of the large striped paper to fit the top and glue in place. Cut 2 pieces of the small striped paper to fit the drawers and glue in place. Take the checkered printie and cut strips 1 block wide. Trim the top and down the sides with this trim.

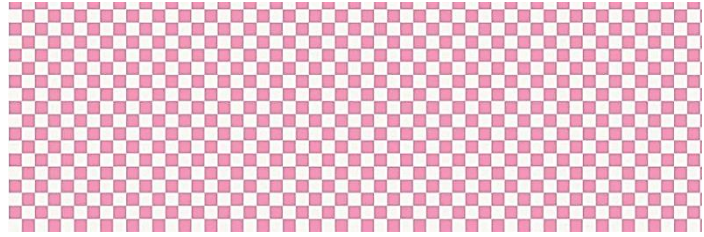

When dry, spray with a matte finish and add 4 no hole beads for knobs 2 per drawer.

The graphics are on the next page.
