

FLAMINGO STANDING LAMP

Barb Kenyeres

SUPPLIES:

Flamingo brad (I got mine at a scrapbook store), an earring post, a long bugle bead, a bead cap for the lampshade, a straight pin with small round top (or add a bead to a standard straight pin) and Glue - I used E6000.

Making the Lamp Pole: Thread the pin through the hole in the top of lampshade bead cap and add glue along the pin before threading the bugle bead. Then thread and glue the earring brad to the bottom of the bugle bead.

Clip off the metal fasteners at the back of the flamingo along the edges. Glue the back and bottom of the Flamingo and attach to the front of the lamp pole.
