

FLOWER POT PEOPLE (AND A FEW FRIENDS)

By Kathryn Asbahr

There are lots of ideas for making flower pot people on the internet. Some pictures are included at the end of the instructions.

Materials:

- Grandt Line 3568*
- Perlers
- Plastic welding cement such as Plast-I-Weld
- Super Glue
- Craft glue
- Paint
- No hole beads

*Grandt Line 3568 can sometimes be tricky to find. Check eBay and Walthers.com. Also check your local model train store. PNWMiniatures on Etsy has 2 different offerings of pots. He uses resin so super glue should be used. Mini Decor and More and Stewart Dollhouse also have pots.

Instructions:

Lay out the pots in the way you want to make your person. There is no right or wrong way to make them. Build in sections and then glue the sections together.

The gnome was made with a pot and a Perler. The no hole beads were added after painting.
The mushrooms used bowls from Mini Decor and More super glued to pots.
The frogs used a pizza pan and the cake and pie tins from Debbie Young.
The horse used lots of pots with a pizza pan on the rear body and a pie tin on the back of the head. Bunka was used for the tail and mane.
The tower of pots is from 4 pots stacked at angles. The welding cement makes all the difference.
The grass skirt for the tiki pot is made of fennel seeds.

Lots of inspiration!
