

SHEPHERD'S HOOK

Michelle Miller

Materials needed

20 gauge cloth covered wire

Wire cutter and pliers

For the wonky hook - take a piece of wire and start to bend it back and forth to make a zig-zag shape. With pliers bend up a hook on one end and cut off excess. Trim the other end to desired height.

For the plain hook - find a small cylindrical tube to bend the wire over. With pliers bend up a hook on one end and cut off excess. Trim the other end to desired height.
