

WIND CHIMES

Michelle Miller

Take 5 bugle beads and paint them silver. When dry, glue them around the edge of a wide hole bead. Let dry. Take a small round bead and feed a loop of thin wire through it to make the hanger. Glue it to the bead so that it doesn't slide and let dry. Glue the round bead to the other end of the wide mouth bead let dry.

Take a small bead and a piece of fine wire. Glue the bead to one end of the wire and glue the other end to the wide hole bead. Slide it up in the center of all the bugle beads. This piece is the paddle in the middle of the wind chimes.

There's a separate tutorial for the Shepherd's Hook.
